Projects

CliqueUp - A fluid extension to the web service Meetup

- CliqueUp takes Meetup and makes it great, with a clean simple UI based on ease of use. Integrated with a live Google Map and live chat integration, this app will make your next event or social gathering CliqueUp.
- <https://github.com/Vicula/CliqueUp>

RorXam - Simple 8-Bit game made on canvas

- RorXam is a simple 8-bit 2D scroller game where a user avoids obstacles and collects tokens to advance through the game. Player movement and collision detection were built using basic vanilla Javascript and canvas.
- <https://github.com/Vicula/RorXam>

Etsy-Clone - A full-stack rendition of Etsy

- This clone of Etsy takes a Backbone and React project and adds a backend database through MongoDB. The project includes a functioning shopping cart and product sorting.
- <https://github.com/Vicula/assignment-23-etsy-fullstack-react>
